

NILANJANA CHOUDHURY

www.linkedin.com/in/nilanjana-choudhury-804139b0 <https://github.com/iamnilanjana-ops>

PROFESSIONAL SUMMARY:

Software Developer with previous software testing experience and hands-on experience building web applications, AI-powered workflow automations, and full-stack Java projects. Completed LaunchCode AI 101 and currently pursuing the LaunchCode Agentic Specialist program and Agentic Engineer Skilled in Java, JavaScript, React, Spring Boot, SQL, Git, and AI workflow automation using Zapier. Passionate about building practical software solutions, learning emerging AI technologies, and contributing to collaborative development teams.

TECHNICAL SKILLS:

Languages: Java, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: React, Spring Boot, React Router

Databases: MySQL

AI & Automation: Zapier, AI Prompt Engineering, Google Forms, Google Sheets, Workflow, Automation

Tools: Git, GitHub, IntelliJ IDEA, VS Code, MySQL Workbench, Netlify

Art & Craft Marketplace | LaunchCode Software Development Project:

Technologies: Java, Spring Boot, Spring MVC, Spring Data JPA (ORM), SQL, MySQL, React, JavaScript (ES6+), HTML5, CSS3, React Router, REST APIs, Git, GitHub, Netlify

- Designed and developed a responsive web application that enables users to browse, upload, and manage handmade art and craft products.
 - Built reusable React components and implemented state management, event handling, forms, conditional rendering, and client-side routing to create an interactive user experience.
 - Applied modern JavaScript, HTML5, and CSS3 to build responsive, accessible, and mobile-friendly user interfaces.
 - Developed backend functionality using Java, Spring Boot, and Spring MVC following the Model-View-Controller (MVC) architecture.
 - Designed relational database schemas and implemented CRUD operations using MySQL, SQL, and Spring Data JPA (ORM) for persistent data management.
 - Built and integrated RESTful APIs to enable communication between the frontend and backend components of the application.
 - Applied object-oriented programming principles, debugging techniques, exception handling, unit testing concepts, and version control throughout the software development lifecycle.
 - Used Git and GitHub for source code management, branching, collaboration, and project version control.
 - Followed an MVP (Minimum Viable Product) approach, delivering core functionality first and iteratively enhancing the application with additional features and improvements.
 - Deployed and maintained the application using Netlify while following software development best practices and collaborative workflows.
-

AI Product Upload Automation | Hire Human AI 101 Capstone

Technologies: Zapier, Google Forms, Google Sheets, AI Prompt Engineering

- Designed an AI-powered workflow to automate product submissions.
 - Built automated workflows connecting Google Forms, Google Sheets, and Zapier.
 - Created AI prompts to generate product descriptions, categories, and tags.
 - Reduced repetitive manual work by automating product data processing.
 - Improved workflow efficiency and data organization through no-code AI automation.
-

AI Lead Scoring & Routing Automation | Hire Human Agentic Specialist (In Progress)

Technologies: Zapier Agents, Slack, Google Sheets, AI Prompt Engineering

- Built an AI-powered lead qualification workflow that automatically evaluated incoming business leads.
 - Designed prompt-based scoring logic using company size, urgency, job title, and business use case.
 - Automated leads route to the appropriate sales team through Slack.
 - Recorded lead scores and routing decisions in Google Sheets.
 - Applied modular workflow design, testing, and prompt iteration to improve automation accuracy.
-

Agentic Engineering | Hire Human Agentic Engineer (In Progress)

Technologies: Docker, Python, FastAPI, MCP, OpenAI Agents, Git, CI/CD, Prompt Engineering

- Built containerized AI agent development environments using Docker.
 - Designed modular AI agents with reusable skills, structured memory, and scoped context.
 - Orchestrated specialized AI agents for planning, implementation, testing, and review tasks.
 - Integrated MCP-backed tools for persistent storage and vector retrieval.
 - Applied governance policies, least-privilege access, and audit logging for secure AI workflows.
 - Evaluated engineering workflows to balance agentic AI, deterministic code, and human decision-making.
 - Developing a portfolio-ready multi-agent engineering pipeline with measurable quality and performance improvements.
-

PROFESSIONAL EXPERIENCE

Manual Software Tester

Ezy Tech Software Solutions Pvt. Ltd. | India

July 2010 – December 2012

Performed functional, regression, and usability testing for e-commerce applications.

Identified, documented, and tracked software defects throughout the development lifecycle.

Collaborated with developers to verify fixes and improve application quality.

Validated checkout workflows, product management features, and user interfaces.

Produced detailed testing documentation while meeting project deadlines.

System Engineer

Client Projects for Cognizant & PwC

September 2007 – August 2010

Supported enterprise software and client application environments.

Collaborated with cross-functional teams to troubleshoot technical issues.

NILANJANA CHOUDHURY

www.linkedin.com/in/nilanjana-choudhury-804139b0 <https://github.com/iamnilanjana-ops>

Assisted with system monitoring and operational support.
Documented technical processes and project activities.
Strengthened analytical, communication, and problem-solving skills while working in large enterprise environments.

EDUCATION:

LaunchCode
Software Development Program
Expected Completion: 2026
Relevant Coursework
Java
Spring Boot
React
JavaScript
HTML/CSS
SQL
Software Development
AI Workflow Automation
Agentic AI Systems

Graduation:

Calcutta Institute of Engineering and Management
West Bengal University of Technology
Bachelor of Technology (B.Tech)
Information Technology
2003–2007

CERTIFICATIONS

Oracle Certified Associate (OCA) – Oracle (2010)
LaunchCode AI 101 (Completed)
LaunchCode Agentic Specialist (In Progress)
LaunchCode Agentic Engineer (In Progress)

Place:

Eureka, St. Louis
Missouri
